

InterContinental Journal of Computer Science

Area and scope

- Computing
- Algorithms
- Information Technology
- Architecture
- Artificial Intelligence
- Computational geometry, complexity and engineering
- Computer science and game theory
- Computer vision and pattern recognition
- Computers and society
- Communication networks and security
- Data structures and algorithms
- Data bases theory and applications
- Discrete mathematics
- Distributed, embedded and parallel systems
- Control theory and robotics
- Multimedia and computer graphics
- e-services and bio-science
- Signal processing
- Software engineering and its applications
